PROGRAMME OVERVIEW

PROGRAMME DURATION	3 Months
ACADEMIC LEVEL	Industry Certification
TOTAL CREDITS	N/A
SAQA REGISTRATION	Pending
MODE OF DELIVERY	Online
TOTAL INVESTMENT	R 9,000 (Registration Deposit: R 799)

Executive Introduction

Technology is completely useless if it does not serve a specific, measurable business goal. Our IT Management programme is an elite leadership track designed to turn senior engineers into executive-level decision-makers. This course focuses heavily on the intersection of technical excellence, financial rigor, and high-level organizational strategy.

Students will explore the 'Business of IT,' learning how to manage multi-million rand budgets, negotiate ruthless SLAs with global vendors, and lead cross-functional engineering teams. The curriculum is rooted in ITIL and COBIT frameworks, teaching you how to implement 'Service Excellence' standards that perfectly align technology with corporate objectives. You will learn the art of 'Strategic Foresight'—predicting exactly how future shifts in AI, Cloud, and Security will impact your company's bottom line.

The training emphasizes 'Executive Presence,' teaching you how to sit in the boardroom and communicate technical risk entirely in terms of ROI and business impact. You will graduate as a high-tier Technology Leader ready to take on the role of IT Director or Chief Technology Officer (CTO), possessing the rare hybrid capability to speak both 'Code' and 'Commerce'.

PURPOSE OF THE LEARNING PROGRAMME

To produce the next generation of 'Chief Technology Officers' (CTOs) and IT Directors. The primary purpose of this track is to bridge the massive communication gap between the technical server room and the executive boardroom.

To master the art of 'High-Value' IT resource management and capital expenditure. We aim to train leaders who can maximize the ROI of technical investments, ensuring that every cent spent on technology drives a measurable corporate outcome.

To promote ethical, sustainable, and legally compliant digital transformation within organizations. The objective is to produce managers who understand the long-term social and economic impact of technology adoption, leading organizations through change with absolute integrity.

To address the severe global shortage of 'Hybrid' technical leaders. This programme provides the specific management frameworks and credentials required to oversee large IT departments in a rapidly changing, heavily automated global economy.

To foster a mindset of operational excellence and corporate agility. The purpose of this track is to ensure that IT leaders can build departments that are not just viewed as 'Cost Centers,' but recognized as 'Innovation Hubs' that drive sustainable business success.

MODULE BREAKDOWN

Module 00: Orientation & Student Portal Onboarding

Mandatory setup: Email, Portal, Labs & PoE guidelines.

Module 01: IT Governance & Strategy (ITIL)

Comprehensive mastery and practical application of it governance & strategy (itil) aligning with industry standards.
